“Himeji Castle is famous for both its beauty and defensive design.
The castle complex has maze-like paths, gates, and hidden defensive systems to confuse enemies.
The white walls are covered with plaster, which also helped protect the castle from fire.
The main keep looks five stories from outside, but it actually has seven levels inside.
From the top floor, you can enjoy a panoramic view of Himeji City.”

MAEDORE FISHMARKET

““Maedore Market is a local seafood market in Himeji where you can enjoy fresh fish and seafood from the nearby Harima Sea.

The word ‘Maedore’ means fish caught locally and delivered fresh on the same day.

Visitors can enjoy authentic Japanese seafood culture, local dishes, and a lively market atmosphere.”
